DETAILED ACTION

Election/Restrictions

Amended claims 3 and 5 are directed to a species that is independent or distinct from the species originally claimed (as best understood) for the following reasons: the species as originally claimed was drawn to a tank being horizontally divided where the divider is movable up and down. The species of claims 3 and 5 are distinct from this embodiment as they require vertical division or pillars with an inner and outer tank and are not divided horizontally.

Since applicant has received an action on the merits for the originally presented invention (as it was best understood at the time), this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 3 and 5 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Response to Arguments

Applicant's arguments filed 4/23/08 have been fully considered but they are not persuasive. In response to applicant's argument that "...each chamber being filled with the same liquid, powder or grain", a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In the instant case Usher is capable of having fill material in both chambers.

Claim Objections

Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 6 recites the same intended use limitation as claim 1 from which it depends.

Claim 1 recites the limitation "the service tank" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Usher (1367900).

Regarding claims 1, 6: Usher discloses a liquid, powder or grain feed tank, wherein the service tank is provided with a tank body to be filled with liquid, powder, or grain, the inside of the said tank body being divided into two chambers (upper and lower) with a separating wall (D), said separating wall being movable upward and downward to relatively increase and/or decrease the volumes of the two chambers, and each chamber being filled with the same liquid, powder, or grain (where the limitation of the tank being filled is an intended use that Usher is certainly capable of).

Regarding claim 2: The fluid, powder or grain feed tank of claim 1, wherein the inside of the said tank body is divided horizontally into an upper part and a lower part to form an upper chamber and a lower chamber with a separating wall that is movable upward and downward (figure 1).

Regarding claim 4: The fluid, powder or grain feed tank of claim 1, wherein the separating wall is made of a multi-angular or round base plate (d) and a slidable sheet (D, where D slides up and down the cable), the said slidable sheet being fixed at one end on the periphery of the said base plate (where it is fixed via element e), and being fixed at the other end on the inside walls of the tank body (figure 1).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
